RML Example 0: Catchforms

RML (Report Markup Language) is ReportLab's own language for specifying the appearance of a printed page, which is converted into PDF by the utility rml2pdf.

These RML samples showcase techniques and features for generating various types of output and are distributed within our commercial package as test cases. Each should be self explanatory and stand alone.

Hello World. This is a normal paragraph. Blah IPO blah blah blah profit blah growth forecast blah IPO. Blah reengineering growth forward-thinking blah. Blah doubletalk profit growth forward-thinking.
