RML Example 25: Indents

RML (Report Markup Language) is ReportLab's own language for specifying the appearance of a printed page, which is converted into PDF by the utility rml2pdf.

These RML samples showcase techniques and features for generating various types of output and are distributed within our commercial package as test cases. Each should be self explanatory and stand alone.
RML Example 25: Indents

though we switched frames automatically.

This text should be unindented i.e. it is at the standard frame size and has not been affected by the switch to this frame which was done using `<nextFrame/>`.

This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left.

This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left.

This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left.

This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left.

This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left.

This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left. This text should be indented an extra 1 cm on the left.

This text should be still be indented an extra 1 cm on the left even though we switched frames using `<nextFrame/>`. This text should be still be indented an extra 1 cm on the left even though we switched frames using `<nextFrame/>`. This text should be still be indented an extra 1 cm on the left even though we switched frames using `<nextFrame/>`. This text should be still be indented an extra 1 cm on the left even though we switched frames using `<nextFrame/>`.

This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented.

This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented. This text should be unindented.

We did an `<indent left="1cm"/>` tag inside the original one. We did an `<indent left="1cm"/>` tag inside the original one. We did an `<indent left="1cm"/>` tag inside the original one. We did an `<indent left="1cm"/>` tag inside the original one. We did an `<indent left="1cm"/>` tag inside the original one. We did an `<indent left="1cm"/>` tag inside the original one.

We did an `<indent left="1cm"/>` tag inside the original one. We did an `<indent left="1cm"/>` tag inside the original one. We did an `<indent left="1cm"/>` tag inside the original one. We did an `<indent left="1cm"/>` tag inside the original one. We did an `<indent left="1cm"/>` tag inside the original one.
We closed one of the indent tags. We closed one of the indent tags. We closed one of the indent tags. We closed one of the indent tags. Now we closed the other indent tag. Now we closed the other indent tag. Now we closed the other indent tag. Now we closed the other indent tag. Now we closed the other indent tag.

Now order lists with seqChain/Format

1) Item 1 of outer list.
2) Item 2 of outer list.
   a) Item 1 of first level list.
   b) Item 2 of first level list.
      i) Item 1 of second level list.
      ii) Item 2 of second level list.
   c) Item 3 of first level list.
      i) Item 1 of second second level list.
      ii) Item 2 of second second level list.
         ■ Item 1 of third level list.
         ■ Item 2 of third level list.
3) Item 3 of outer list.

This tests the singleton version of the indent tag.

This text should be indented an extra 1cm on the left.
This text should not have the extra indent.
| Below we should colour the background light green |
| We should have a light green background here    |
| We should have a light green background here with a thick pink border |
Below we should colour the background lightgreen
We should have a light green background here
Here we should have no background.
RML Example 25: Indents

We should have a light blue background here and the whole frame should be filled in.
RML Example 25: Indents

Here we should have no background again.
Below we should colour the background lightgreen
We should have a light green background here
Here we should still have a lightgreen background.
RML Example 25: Indents

We should have a lightgreen/lightblue background.
Here we should have only light green background.
