RML Example 40: Doc_programming

RML (Report Markup Language) is ReportLab’s own language for specifying the appearance of a printed page, which is converted into PDF by the utility rml2pdf.

These RML samples showcase techniques and features for generating various types of output and are distributed within our commercial package as test cases. Each should be self explanatory and stand alone.

Hello World. This is a normal paragraph. Blah IPO blah blah blah blah growth forecast blah blah blah forecast blah. Blah blah blah blah blah blah blah blah blah blah profit blah blah blah blah blah blah blah blah blah blah IPO. Blah blah blah blah blah blah blah reengineering blah growth blah blah growth profit blah grow growth bo profit. Blah blah blah blah venture capital blah blah blah blah forward-thinking blah. Here are some common characters =

This is another normal paragraph. Blah IPO blah blah blah growth forecast blah blah blah forecast blah. Blah blah blah blah blah profit blah growth blah profit blah profit profit profit. Blah blah blah profit blah reengineering blah growth profit profit profit profit profit. Here are some common characters =

This is spaced. There should be 12 points before and after.

The value of i is not larger than to 3
The value of i is equal to 3
The value of i is not less than to 3

The value of i is

The value of i is 2
The value of i is 1
